

**How I Ranked
Krishnasree.com** 

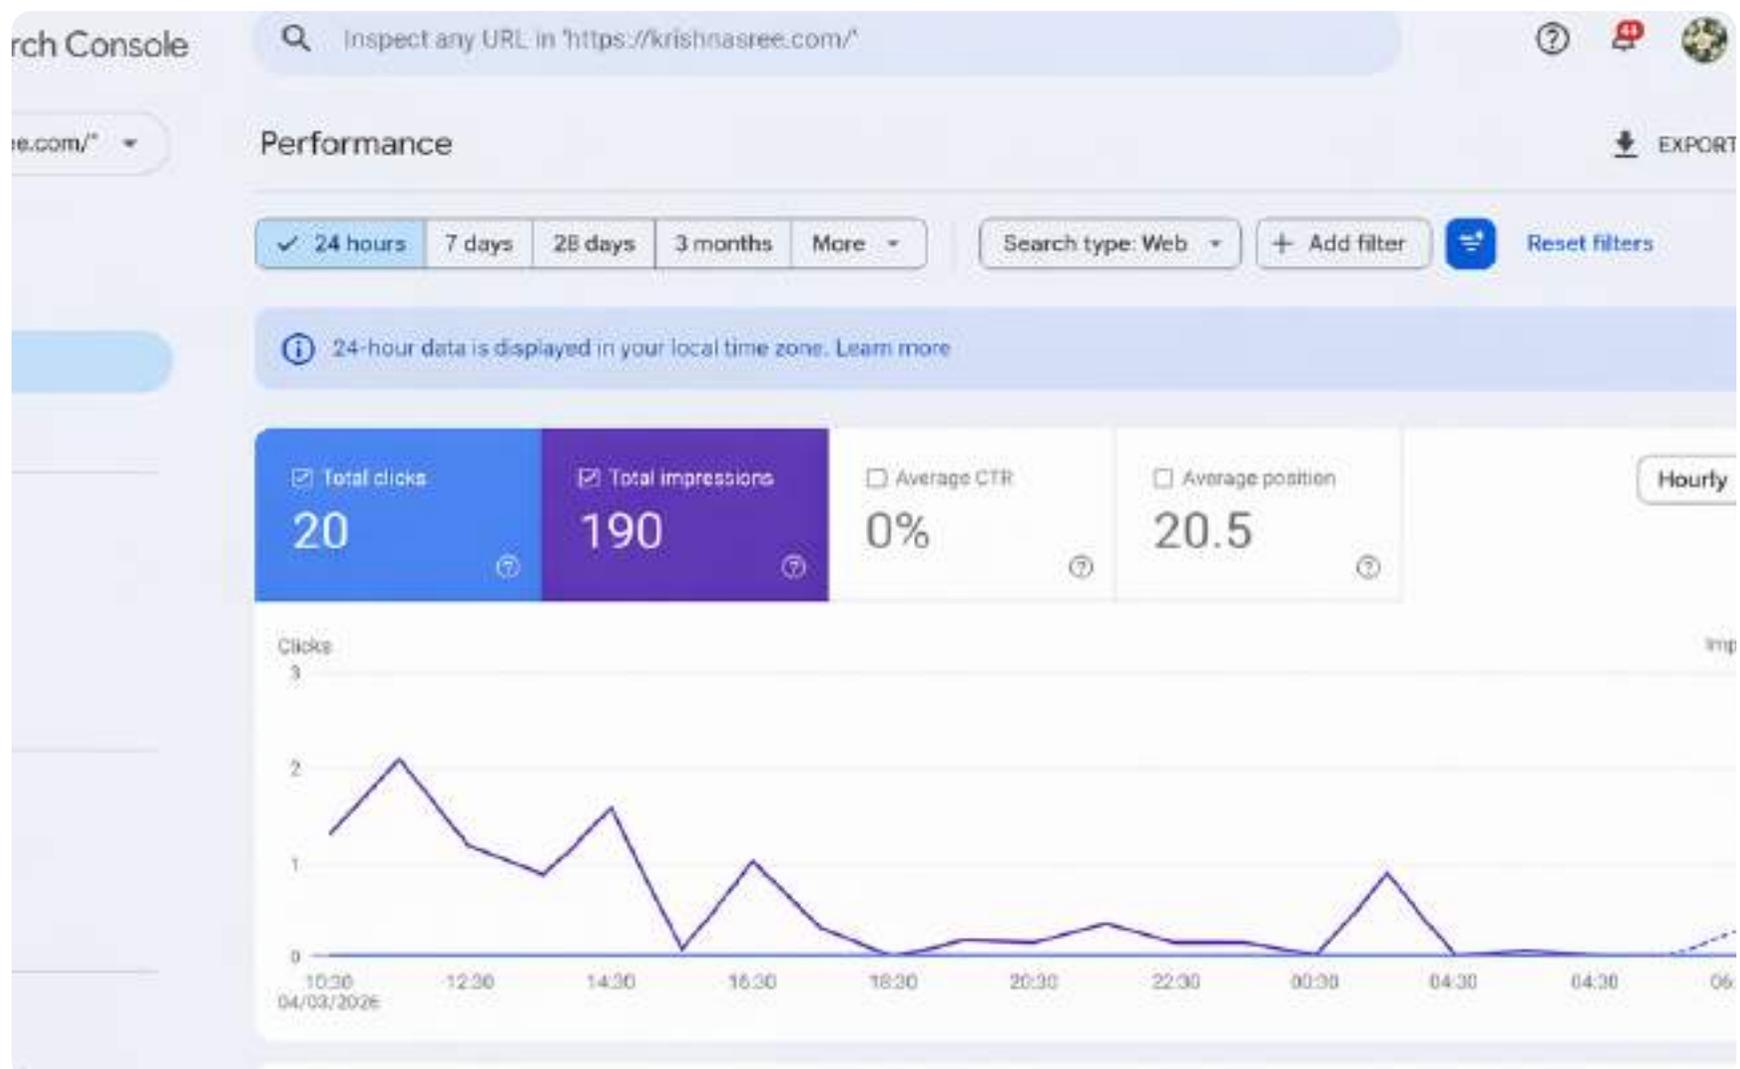

My SEO journey with any project always starts at the roots. First of all, I clear all on-page activities on the site to make sure the foundation is solid. There's no point in driving traffic to a site that Google can't read properly, so I personally audit the structure, metadata, and content first.

My On-Page SEO Checklist

- Assigning the Focus Keyword
- Content Optimisation
- Image Alt Text & Optimization
- Keyword Density Check
- Image Compression
- Title Tag & Meta Description
- Header Tag Hierarchy (H1-H6)
- URL Slug Customization
- Internal Linking
- Connecting Search Console
- Sitemap Generation
- Google Analytics 4 (GA4) Setup
- SSL (HTTPS) Check
- Mobile Responsiveness

After finishing on-page SEO and making sure your site foundation is perfect, I move straight into the off-page SEO stage. My team and I focus on building high-quality backlinks and improving your brand's authority across the web.

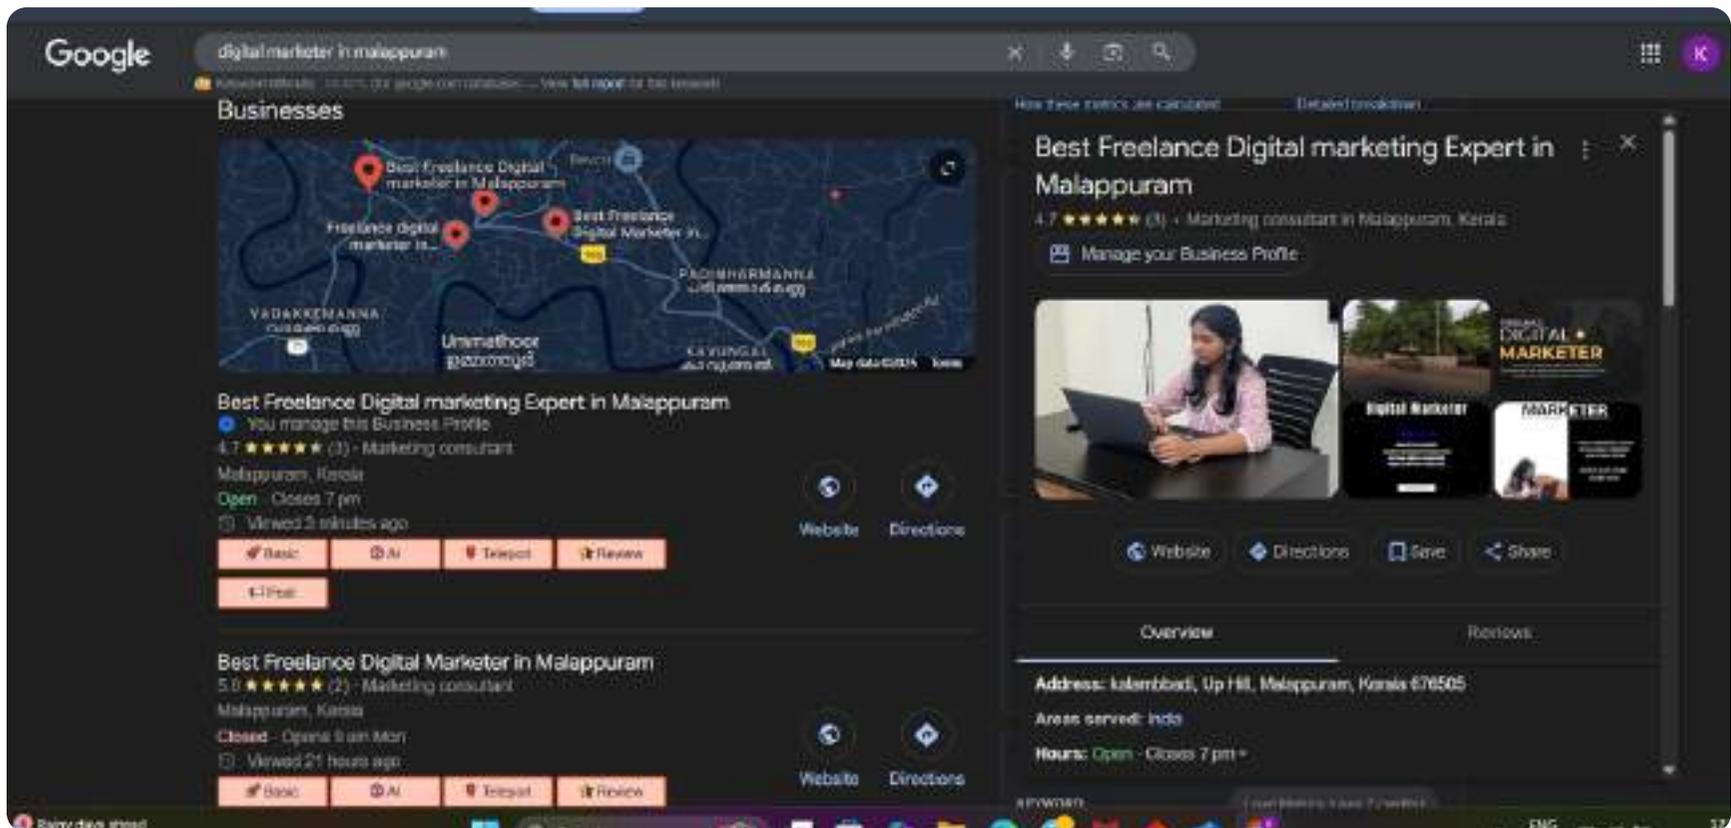

My Off-Page SEO Checklist

- Backlink Audit
- Guest Posting
- Broken Link Building
- Competitor Analysis
- Google Business Profile
- Social Media Signals

- Social Bookmarking

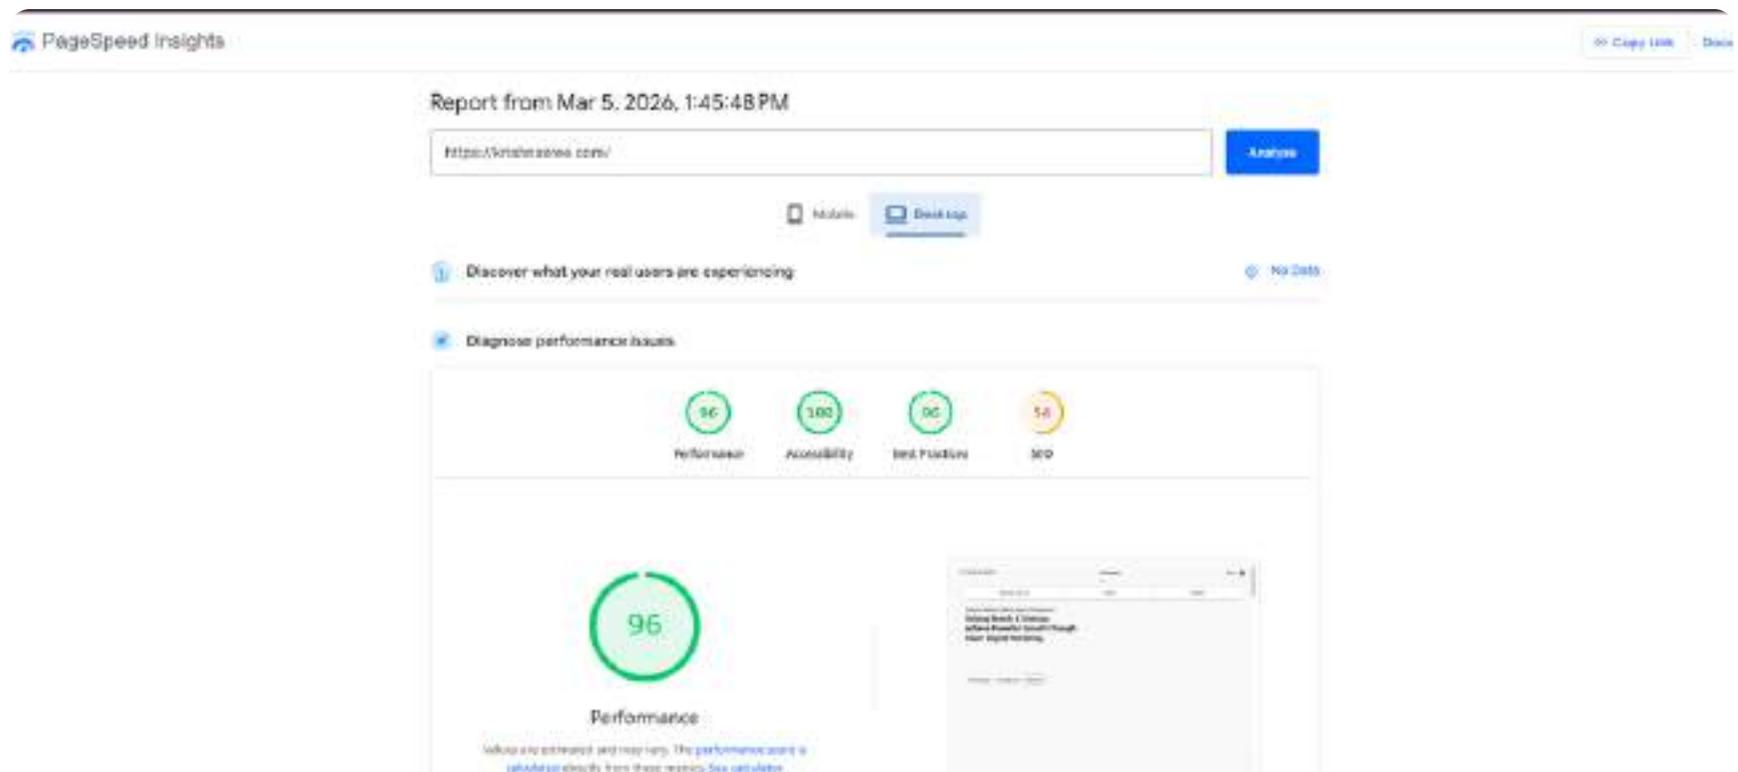

Google Business Profile

Alongside my Off-Page SEO strategy, I set up and optimised Google Business Profile to establish my local authority. This profile is a vital off-page asset because it validates my physical presence in my place and builds immediate trust through public customer reviews. By appearing in the Local Map Pack, I capture the highest-intent traffic from users searching for services near me. It acts as a bridge between my digital reputation and real-world credibility, ensuring Google recognises me as a verified industry leader.

Ultimately, an optimised profile drives more calls and inquiries than a standard search listing alone, making it essential for local growth.

After finishing my SEO work, I perform a final audit to ensure the site is fully optimized and fast across all devices. This step guarantees a seamless experience, reduces bounce rates, and proves technical perfection to Google. Only when these performance metrics are fully met is the SEO strategy considered complete and truly effective.

Through strategic on-page and off-page SEO, I successfully ranked krishnasree.com on the front page of Google.
